LIFE

Step into a
sustainable future

Research.
Sustainability.
Innovation.

Kava Life is committed towards innovating applications of bioactive ingredients that play a crucial role in a wide range of industries.

Ranging from Pharmaceutical, cosmetic, supplements to the beverage industry, these high-quality natural herb extracts are ready to revolutionize and make a lasting impact.

Chairman Forward

“

Kava Life evolved as an insight from a personal incident.

A ligament surgery and heavy medication with multiple side-effects, sparked my interest in the use of natural herbs as an alternative to synthetic chemicals. I started my research with Boswellia, a natural herb to strengthen the ligaments.

Since then, there has been no looking back. The extensive research has made AKBA(Acetyl-11-keto-beta-boswellic acid) a key product in our ever-increasing nutraceutical portfolio.

”

Innovation + Continuous Research= Sustainable & Efficient Production

Research lies at the heart of Kava Life. We focus on bringing innovation and crafting sustainable solutions. High quality natural extracts can be a real game changer in the making of a sustainable future.

Our Products

Our Diverse range of natural
herbal extracts include:

Nutraceuticals

Plant based
alternatives to
Pharma
Products

Includes
health promoting
bio-active
compounds

These are
extracted, refined, and
created into purified
preparations

AKBA(Acetyl-11-keto-beta-boswellic acid)/ Boswellia Extract

“

Even Papyrus Ebers, written around
1500 BC mentions it as an effective drug

”

- Boswellic acid is a pentacyclic triterpene compound extracted from the plant *Boswellia serrate* gum resin.
- *Boswellia* is popularly known as the Indian Frankincense
- Used as an effective remedy especially in joint care and anti-inflammatory applications
